Description

Abstract

North Carolina Truck Network

Purpose

Display restricted and non-restricted truck routes.

Supplementary Information

All primary highways (US and NC routes) in North Carolina, unless they are non-restricted or restricted, are available for all legal truck and vehicle combinations, except twin trailers (semi-trailer and trailer), in accordance with general statute §20-115.1(b).

Non-restricted routes are available to all truck and vehicle combinations including trucks with twin trailers (semi-trailer and trailer) and trucks with 53-foot semi-trailers. Non-restricted routes include National Network routes (23 CFR 658) and any route designated by the North Carolina Department of Transportation (NCDOT) under general statute §20-115.1(g) for use by all legal vehicle combinations.

Restricted routes are any route where a truck restriction or prohibition exists. Restrictions may be based on length, width, weight, number of axles, type of truck, and/or vehicle combination and are usually in place for safety or infrastructure preservation reasons. The restriction data does not include routes with posted bridge weights or low-weight secondary roads. The truck restriction table should be consulted for specific restrictions on specific roads.

Status of the data

Complete

Data update frequency: Quarterly

Time period for which the data is relevant

Date and time: 03-27-2012
